A Message to our Customers regarding Changes to Conservation Programs

Newmarket – Tay Power Distribution Ltd. and Midland Power would like to thank all of our customers for the success of our energy-efficiency programs during the Conservation First Framework. It is through your participation in the programs and commitment to energy efficiency that, together, we were able to reduce the electricity use in our communities.

As of March 21, 2019, there has been a change in the energy-efficiency programs. The Minister of Energy, Northern Development and Mines issued a directive that cancels the Conservation First Framework as well as some programs and moves the administration of the remaining programs to the Independent Electricity System Operator (IESO) through an Interim Framework.

The chart on page 2 indicates the status of each program. Further details on program changes can be found at <https://saveonenergy.ca/en>

Customers with existing approved projects that are already underway can continue to look to Newmarket – Tay Power and Midland Power for information and support until the project is completed. Those looking to start new applications in programs that are continuing can do so directly with the IESO.

The Save on Energy call centre can be reached at 1-877-797-9473 or check out their [FAQs](#).

If we can be of assistance, please contact us so that we can ensure the transition to the Interim Framework is as easy as possible.

Thank you again for your participation in the Conservation First programs. It has been a pleasure to work with our communities of Midland, Newmarket, Port McNicoll, Victoria Harbour and Waubaushene to reduce electricity use.

For further information on the recent directive see:

<http://www.ieso.ca/en/Sector-Participants/Conservation-Delivery-and-Tools/Interim-Framework>
