PLEASE JOIN
US AT OUR

Customer Information Meeting

Friday, April 5
12:00 PM - 1:30 PM

Midland PUC
16984 Highway 12
Midland, Ontario

**Streets to be upgraded in 2019:
Hanly Street, Second Street and Midland Avenue**

WHAT TO EXPECT:

1. Locate marks for underground services will be done prior to the work crew's arrival. These marks are made with water soluble paint and will disappear over time.
2. New pole locations will be marked with stakes and the best time for residents to discuss the location with work crews is when the stakes first go in the ground.
3. The original pole may be left in the ground to give third party attachers (such as telephone or cable) time to transfer their services to the new pole.
4. Residents may experience minor traffic delays and some tree trimming may be required.

Thanks for working with us to bring safe, reliable electricity to your homes.
